Dear Max,

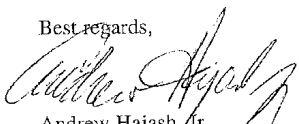

Attached are the Scanning Electron photomicrographs and the Energy Dispersive chemical analyses of samples you sent to me. Also attached are the original samples less what was lost during the analysis. As I mentioned on the phone, none of the samples are gold.

Instead they appear to be plastic (samples #1 and #2) with extremely thin metallized coating (similar to "glitter"), a nickel metal flake (sample #3), and a weathered flake of the mineral mica (sample #4).

#3 & #4 WERE OTHER PARTICLES FOUND NEAR THE GOLDEN PARTICLES (#1 & 2). THE #3 & 4 SAMPLES ARE APPARENTLY NOT PART OF THE MANIFESTATION.

I would love to see your art studio some day.

Best regards,

Andrew Hajash, Jr.
Professor and Department Head

NOTES ABOUT SAMPLES:

- #1 - ONE OF HUNDREDS OF GOLDEN PARTICLES FOUND IN GREINER'S PRAYER CLOSET/BATHROOM ON 3/7/99, ON THE FLOOR, WALL, DOOR, DOOR FRAME & COUNTER - ALL SQUARE □
- #2 - ONE LARGE (3/32") FLAKE/SLIVER FOUND ON SHERRY GREINER'S NECK, AMONG DOZENS OF THE SMALLER GOLDEN PARTICLES. THEY MATERIALIZED ON 7/18/99, IN PORT ARTHUR, TX AS NINE PEOPLE WATCHED. AT THE TIME MAX & SHERRY WERE ANSWERING QUESTIONS FOR AN HOUR ABOUT JESUS, FROM SHERRY'S RELATIVES.
- #3 & #4 - OBJECTS FOUND NEAR BY WHICH TURNED OUT TO BE COMMON, EXPLAINABLE MATERIALS.

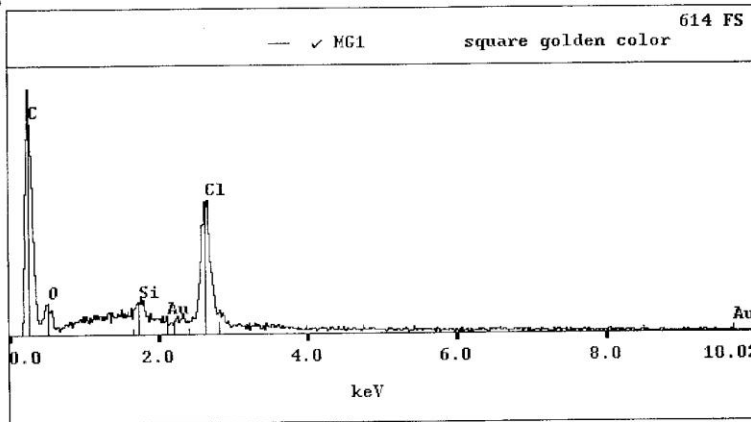

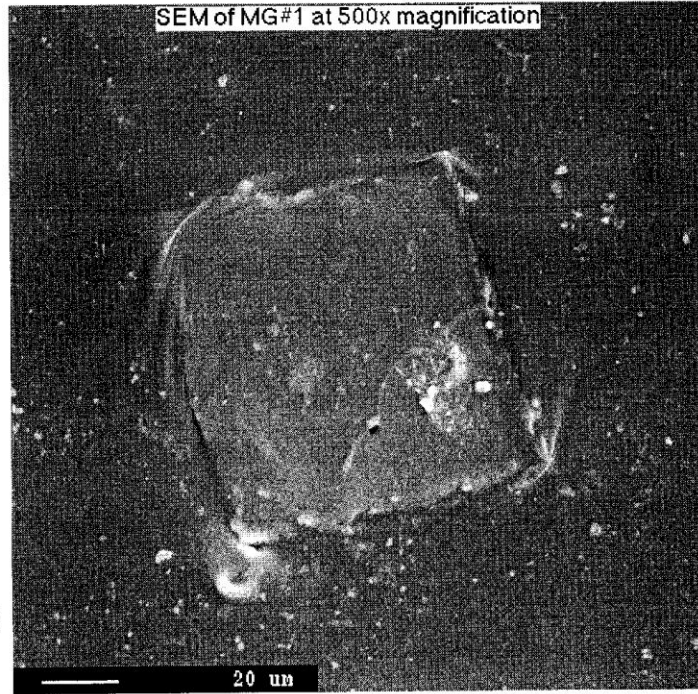

SAMPLES #1 & #2 ARE "CREATED" PARTICLES, DETERMINED FROM #1 SQUARE SHAPE, & FROM THE METAL COATING AROUND THE PLASTIC (OIL BASED) SUBSTANCE. ALL OF THE TINY PARTICLES HAD A UNIFORM SQUARE SHAPE.
